Curative Education and Social Therapy Council

Class meeting for people working in curative education and social therapy
who are members of the First Class

The focus on the essence of the human being

8 p.m. on 3 October to 12.30 p.m. on 4 October 2010
Goetheanum, School of Spiritual Science, Dornach

The theme

In the curative education course (Education for Special Needs), Rudolf Steiner alerts us to focus our observation not only on the individual as such with his or her individual characteristics, gifts and limitations, but also on the karmic situation - how the individual relates to the world around him and the symptomatic life situations that arise for them. This would make it easier to understand anything that has evolved and is evolving in a biography, and actions to provide help could be more specific.

Hearts can read karma
when they learn
to read the word
creative
in human lives
when hearts learn
to speak the word
creative
in our humanity
